Date Printed: 5 July 2017

DEFINITIONS

SERVICE:	Is the pipe between the water main and the property boundary.
MULTI RESIDENTIAL:	A Service which is connected to more than one meter.
NON RESIDENTIAL:	A Service which is provided for commercial purposes.
FIRE SERVICE:	A Service which is solely provided for firefighting use.

CONDITIONS OF SERVICE CONNECTIONS

1. Meters will be positioned above the normal ground surface unless the Aqwest Manager Water Services deems otherwise.
2. Stand pipe with hose cock must be in place not less than one metre from the front boundary at point of connection.
3. Water services are provided for domestic and commercial purposes only and not for garden/lawn reticulation.
4. Service connection will only be provided within 1.2 metres of the side boundary and not on the same side as the vehicle crossover.
5. If services are not able to be installed under normal working conditions, extra charges as considered necessary will be calculated and paid by the applicant.

NOTES ON FIRE FIGHTING WATER SERVICES

The following important points shall be noted and understood in full with regard to the provision of any fire services from Aqwest's reticulated water supply system:

All Fire Fighting Services greater than 25mm shall require a "Medium" level of Backflow Prevention device to be installed as outlined in AS/NZS 3500.1 *National Plumbing & Drainage Code* by a licensed and qualified plumber. All Backflow Prevention Devices shall be tested annually and compliance certificates sent to Aqwest.

1. Section 77, Clause 1 of the Water Services Act 2012 states "*A licensee may interrupt, suspend or restrict the provision of a water service to the extent to which it is necessary, in the licensee's opinion, to do so because of an accident, emergency, potential danger or other unavoidable cause, or for the purposes of maintenance and repair*". If this impacts on the fire fighting services to any property, it is the property owner's responsibility to make provision to suit their fire fighting requirements.
2. In accordance with our Operating Licence for a standard water supply, Aqwest is required to supply a flow rate of 20 litres per minute at 15 metres minimum static pressure. As a fire service is not a standard water supply, the property owner/developer is advised to make provision to suit individual fire fighting requirements.
3. Aqwest does not guarantee and is under no obligation to maintain constant pressures for the life of the service, and it is the Owner's responsibility to check their fire service installation and ongoing for the life of the service to ensure that it meets their demand.
4. Aqwest's systems are undergoing constant change and variation to operational settings, and for this reason premises with specific requirements should consult their suitably appointed hydraulics consultant.
5. The provision of fire fighting services is for the sole purpose of emergency situations fighting fires. All non-compliant consumption will be calculated and charged at a penalty rate as determined by Aqwest.

6. Acknowledgment

The owner/applicant acknowledges that the owner/applicant has made his own independent enquiries with regard to all matters relevant to the provision of the water service, in order to determine the suitability of the service and the owner/applicant acknowledges that the owner/applicant has not sought nor been given any advice with regard to the suitability of the service from Aqwest and that Aqwest have not expressly or impliedly represented or warranted to the owner/applicant that the service is suitable or adequate for the purposes intended by the owner/applicant and that all warranties (if any) as to suitability and adequacy thereof implied by law are expressly negated and the owner/applicant further acknowledges that the owner/applicant has himself specified to Aqwest the service which is required by the owner/applicant, based upon the owner/applicant's own independent enquiries and investigations.

7. Release, Discharge and Indemnity

The owner/applicant shall use the service at the owner/applicant's own risk and the owner/applicant hereby released Aqwest to the full extent provided by law, including Aqwest's servants and contractors from all claims and demands of every kind resulting from any damages to property or injury to person as a consequence of any failure of or deficiency or fault with the service and the owner/applicant hereby indemnifies and shall keep Aqwest indemnified in respect of all and any such claims, liability, costs and expenses without limitation.
